

Bluewater Technology Solutions provides the highest quality chemical products to distributors and manufacturers nationwide. Our advanced R&D and Production techniques develop and deliver unmatched product performance, while our sales and customer support personnel provide the service and support you demand.

The **Micro-Armor** family of greases, spray lubricants, and oil products protect your investment of vehicles and machinery better than any lubricants on the market today. The patented **Micro-Armor** technology dramatically reduces friction in your metal parts, therefore reducing heat and surface wear, improving performance, and extending the useful life of your vehicles and machinery. These results are significant and measurable.
